Notes

The information presented in the table represents total numbers of community-associated cases per year; San Quentin cases are not included in this report unless otherwise stated.

Sources: 2009- March 2011: Automated Vital Statistics System (AVSS), except where otherwise noted.

- Year for each case assigned based on date the case was reported from Marin County Department of Health and Human Services to the California Department of Public Health.

March 2011-2013: California Reportable Disease Information Exchange (CalREDIE), except where otherwise noted.

- Year for each case assigned based on the earliest available date: symptom onset, diagnosis, report from provider or laboratory to Marin County Department of Health & Human Services, or entry into CalREDIE system.

[^] In 2011, Marin County changed data systems. Some duplication may be possible in 2011, so case counts may be slightly higher than other years.

* Source: Marin County Department of Health & Human Services Epidemiology Program

** Source: Marin County Department of Health & Human Services Tuberculosis Prevention and Control Program. Both community and San Quentin cases are included in the tuberculosis total.
