

2010 Marin County Data Summary:

County of Marin Demographic Profile

General Demographic Characteristics for Marin County

	2000 Census ³	ACS 2006-2008	2010 ¹	Percent Change from 2000 to 2010
Total Population	247,289	246,985	253,682	2.6%
Sex and Age Breakdown				
Female	124,737	123,823	128,263	2.8%
Male	122,552	123,162	125,419	2.3%
under 5 years	13,396	13,550	12,706	-5.2%
5- 9 years	14,338	12,858	16,745	16.8%
10-19 years	26,433	26,702	30,569	15.6%
20-24 years	9,633	13,094	16,114	67.3%
25-34 years	32,015	23,800	23,570	-26.4%
35-44 years	44,586	35,685	28,793	-35.4%
45-54 years	45,592	43,744	40,404	-11.4%
55-59 years	16,791	22,107	21,405	27.5%
60-64 years	11,215	17,180	20,604	83.7%
65-74 years	16,791	20,236	24,382	45.2%
75-84 years	12,060	12,798	12,295	1.9%
85 years and over	4,581	5,231	6,095	33.0%
Race/ Ethnicity Breakdown				
White	207,800	200,482	181,215	-12.8%
Black/African American	7,142	8,000	7,740	8.4%
Amer. Ind./Alaskan Native	1,061	864		
Asian	11,203	13,942	11,037	-1.5%
Pacific Islander	388	540	402	3.6%
Hispanic Ethnicity	27,351	33,569	47,170	72.5%

- Accurate counts of our population take place during census years, with the most recent taking place in 2000. During intercensal years, we use assessments made by the American Community Survey (ACS) and the California Department of Finance (DOF) to evaluate our population numbers.
- The population of Marin County has remained relatively stable. DOF projections show a slight increase of 2.6% for the year 2010 for the whole population, and greater changes for other age categories. In particular, the number of Marin residents between 20-24 years old is projected to have increased by 67% while the population between 60-64 years old is projected to have increased by 84%. We will not be able to confirm the accuracy of these predictions until the 2010 US Census numbers are analyzed and reported.
- Per the DOF projections, the ethnic/racial breakdown of the Marin population will also change somewhat. While the majority of the population will continue to be White, the proportion of the population of Hispanic/Latino ethnicity will increase.

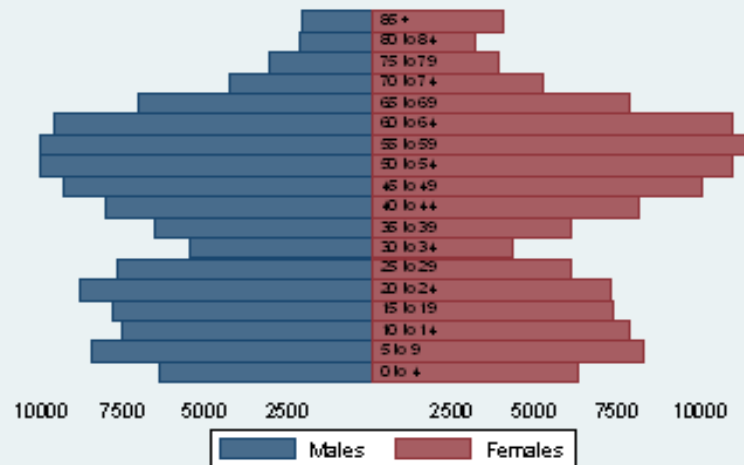

Current Population

Current Age and Sex Breakdown

One third of adults in Marin county are over age 55 years. Children and youth (ages 0-19) comprise an estimated 24% of the population in Marin County compared to 29% in California.

The number of males and females in the population are similar except in the older ages where there are slightly higher numbers of females.¹

County of Marin Male and Female Population by Age, 2010

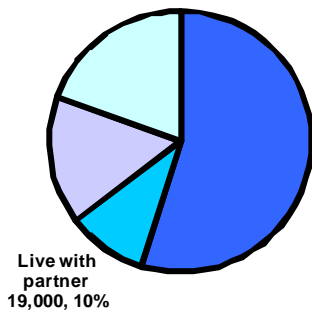

Marital Status

Approximately 2/3 of adults in Marin county are either married or live with partner.²

Single, never married
37,000 17%

Divorced/Widowed/Other
30,000 16%

Education

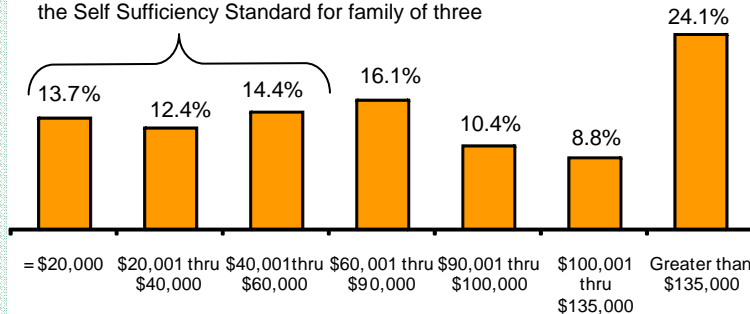

Approximately 90% of adults reported completing a high school education, with 62% of those completing either a four-year college degree or higher.²

Highest Education Level Completed

Less than High School graduate	10.8%
High School graduate	16.6%
Some college/Trade school	17.7%
Four year College Grad	27.6%
Post grad/professional degree	27.3%

Income and Poverty

Over 40% report incomes below what is considered the Self Sufficiency Standard for family of three

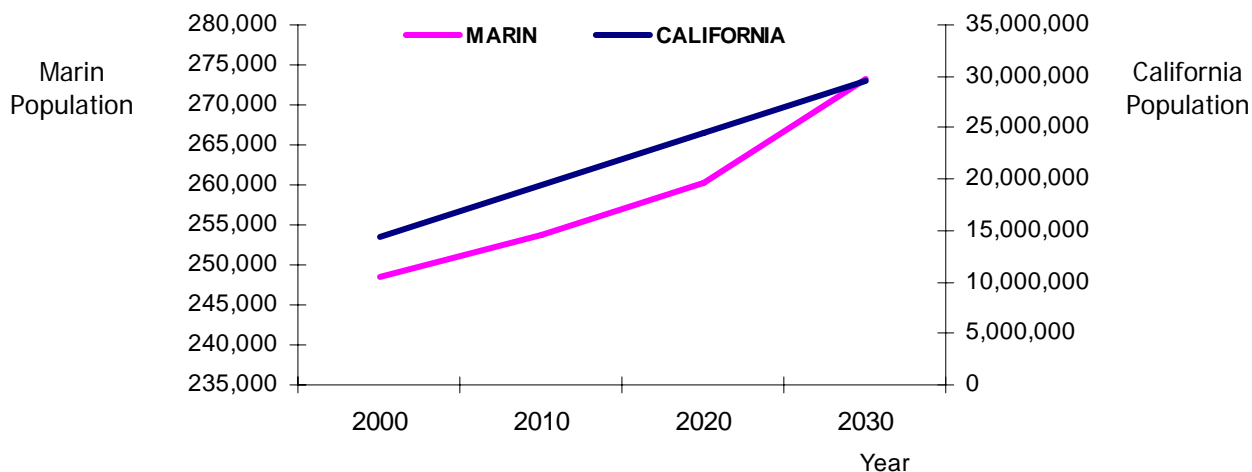

Almost one quarter of adults report household incomes greater than \$135,000. Twelve percent of the Marin Population report living in poverty per Federal Poverty Level (FPL) guidelines. For a family of 3 (the average household size in Marin), the FPL is \$21,060. When the Self-Sufficiency Standard, which calculates the income needed by working families to meet basic needs, is considered, an annual income of \$66,550 would be necessary to meet the most basic expenses for a family of three in Marin County.²

Population Projections

Population of Marin compared to California

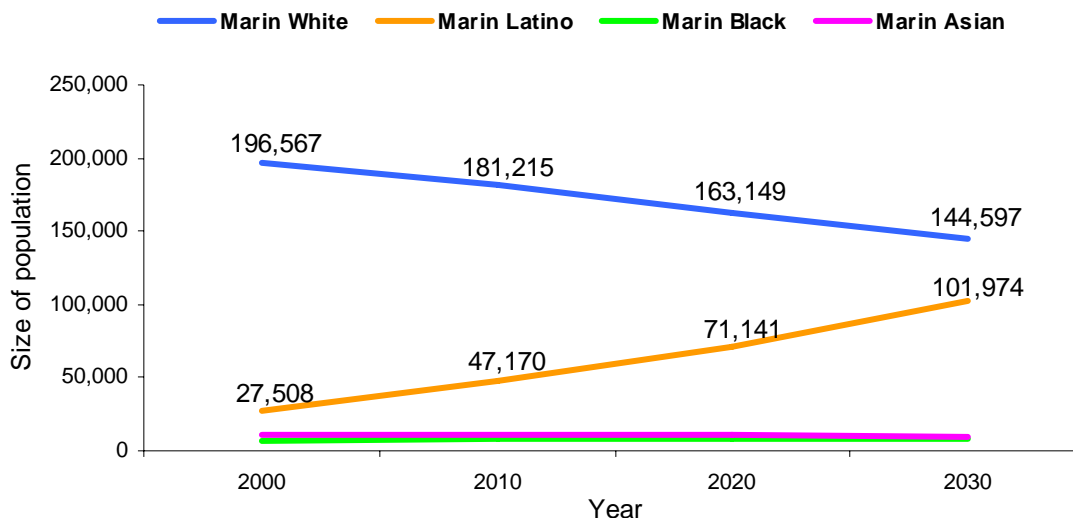

Per DOF projections, the Marin County population will increase slightly over the next twenty years. By 2030, the population will have increased 10% from 2000 census calculations. This differs significantly from California projections where a 44% increase in the statewide population is expected in the same time period.¹

Race/Ethnicity Breakdown

Historically, Marin County has been less diverse than the rest of California; however, that trend is changing. Nearly 3/4 of the Marin County population is White. Latinos are the next largest group at 19%. By 2030, it is projected that Latinos will comprise 38% of the Marin County population, a 100% increase. The proportion of Asian and Black Marin County residents will remain relatively stable.¹

Population by Race/ Ethnicity

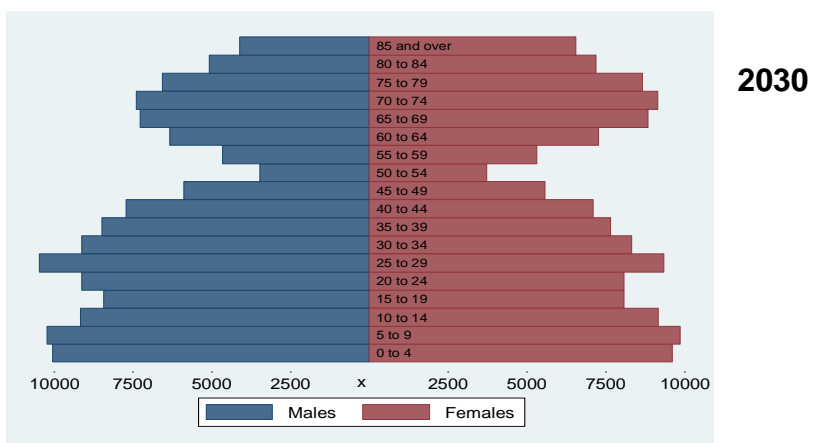

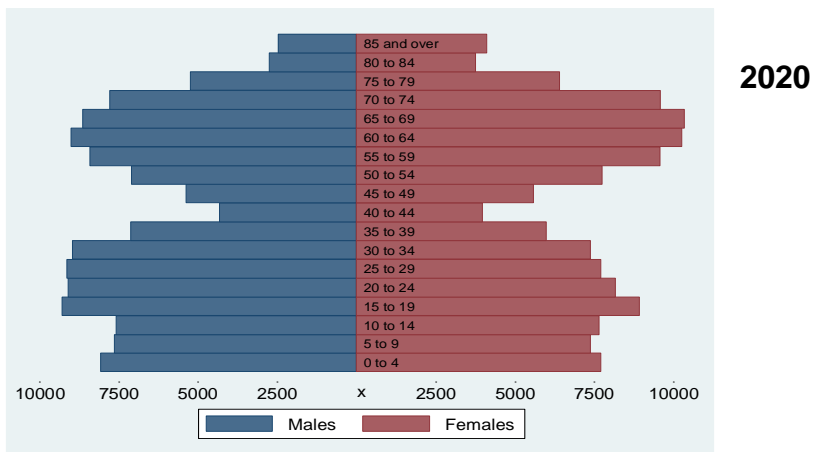

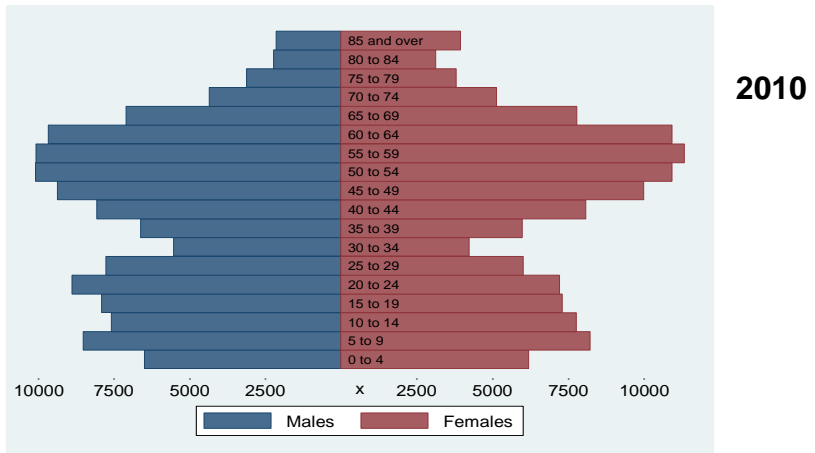

Population Projections

Age Breakdown

The population pyramid for 2010 shows the population by age breakdown where majority of the county's population falls in the 40-54 year-old age group.

Between 2010 and 2020, the total county population is projected to grow by 2.6%. The age breakdown will shift becoming more top and bottom heavy suggesting a greater aging population and greater youth population, with a smaller middle age population. The "oldest seniors" (85+) will increase in numbers beginning in 2020 which will have implications for the need for services to support the county's senior population.

Between 2020 and 2030, the total population is projected to increase by 4.9%.¹
